

# How Resources Flow From Farm to Community

Label each arrow with the correct resource that flows between the two entities.

## Role Playing Cards for Additional Activity

Copy and cut out the role-playing cards below and distribute to students for the Additional Classroom

### FARMER

The farmer produces the milk to start the cycle and bring money back into the community.

Amount of money received:

---

### PROCESSOR

The processor takes the milk and makes a product out of it that people want to buy, increasing the dollar value of the milk.

Amount of money received:

---

### GROCERY STORE OWNER

The grocery store owner markets the product where people want to buy it, increasing the value of the product.

Amount of money received:

---

### CONSUMER

The consumer puts the money into the cycle by paying for the product made from the milk.

Amount of money received:

---

### SERVICE PROVIDER

The service provider provides a service for those making the product. An example could be a veterinarian on the farm or the engineer at the processing plant.

Amount of money received:

---

### SUPPLIER

The supplier provides goods to help make the product. On the farm, this could be the feed. At the plant, it could be product-wrapping materials.

Amount of money received:

---

### EMPLOYEE

The employee helps the work get done and is vital to keeping the process moving.

Amount of money received:

---

### TAX COLLECTOR

The tax collector uses tax dollars to help the community do things like build new roads and make other improvements.

Amount of money received:

---
