

[Read the Reviews:](#)

With the guided reading pamphlets and vocabulary words, this will help boost PSSA test scores.

The video portion was a wonderful motivator. My class wanted to see each one twice!

I liked the way each lesson was thoroughly laid out and included many different ideas.

The lessons were very easy to follow, even without a lot of knowledge about dairy.

The lessons were very beneficial and tied a lot of information into one neat package.

The lessons appeal to a broad audience. They meet state standards, and they have everything I need to teach my students about dairy. Most importantly, they are fun to do.

— Katie Buchanan,
Sacred Heart Elementary

[DISCOVER DAIRY!](#)

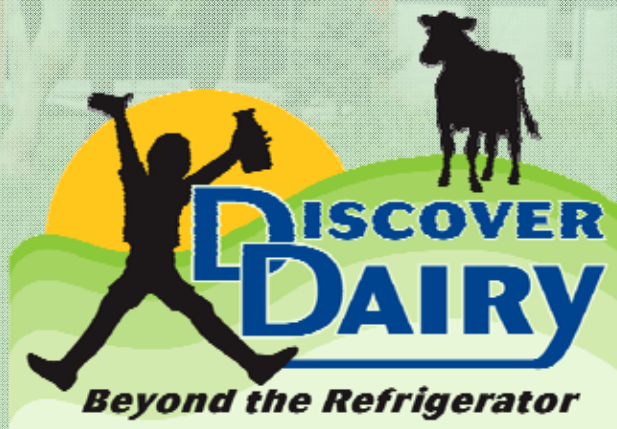

An engaging, cross-curricular, multi-leveled lesson series that meets state educational standards and assessment anchors to teach upper elementary students about the many ways dairy farms contribute to our world.

Produced by the
Pennsylvania
Dairy Promotion
Program

With assistance from the Mid-Atlantic Dairy Association, the Center for Dairy Excellence and the PA Dairy Task Force, an initiative of Governor Edward Rendell and Secretary of Agriculture Dennis Wolf.

Log onto www.discoverdairy.com or call 717-346-0849 for more information.

Find out about how dairy farmers care for their cows, the milk they produce, our environment and our community in this interactive, engaging lesson series available on the Web for upper elementary.

DISCOVER DAIRY

Beyond the Refrigerator

Videos, Lesson Plans, Classroom Activities, Reading Pamphlets, and Interactive Games all found at www.discoverdairy.com

The Lessons:

Five complete 50-minute lessons are included in the lesson series. Each lesson comes with a four-minute video clip, complete lesson plan, guided reading pamphlet, classroom activity and assessment-based worksheet.

The five lessons include:

- Discover Dairy... And Animal Health
- Discover Dairy... And Milk Safety
- Discover Dairy... In the Environment
- Discover Dairy... In the Community
- Discover Dairy... And Nutrition

The lesson series can be taught within a one-week period or in a series of five weeks. The lessons can also be taught individually, but are most effective when used as a series.

For Kids:

Discover Dairy is a fun and engaging way to learn about where milk comes from. In the "KIDS" section, you'll find games, videos and more ways to learn about the many ways dairy farms contribute to our lives. The interactive web-based games reinforce concepts from the Discover Dairy lessons.

There's lots to discover:

- Kids will see how milk gets from the cow to our refrigerator while learning their role in keeping milk safe and fresh.
- They'll find out how farmers care for the environment while experiencing how nutrients are recycled on a dairy farm.
- They'll learn how much milk a cow gives (120 glasses a day!) and find out what she needs to produce milk.
- They'll experience how money moves through an economy and why dairy farms are important to a community.

For Teachers:

Discover Dairy is an engaging, interactive cross-curricular multi-levelled program that meets state educational standards and anchors to show upper elementary students where milk comes from. The lessons will help students understand the many ways dairy farms contribute to our world.

The five "Discover Dairy" lessons:

- Meet state standards and assessment anchors in math, science, health education and reading.
- Integrate relevant vocabulary into reading instruction through a guided reading pamphlet that reinforces the contents of the lesson.
- Features multi-levelled activities meant to address different cognitive levels.

The lesson series, complete with lesson plans, videos and interactive games, is downloadable at www.discoverdairy.com.

Copies of the videos on DVD can be requested by calling 717-346-0849.
